

NEW!

River Publishers eBooks Collection via the IEEE Xplore® Digital Library

River Publishers eBooks Library includes a wide range of engineering and technology topics including circuits and systems, communications, information science and technology, security and digital forensics, and much more.

Features:

- Access to approximately 190 titles, dating back to 2015
- Series in this collection are interlinked, giving a cohesive overview of various cutting-edge technologies at large
- Globally respected and well-established book series editors, many with strong IEEE affiliations
- Content that provides a strong theoretical and practical overview
- Intended for graduate level students, researchers, engineers and professionals
- Up to 30 new titles introduced annually

Top Content Areas:

- Automation, Control, and Robotics
- Biomedical Engineering
- Circuits and Systems
- Communications
- Electronic Materials and Devices
- Energy Management
- Information Science and Technology
- Management Sciences
- Mathematical and Engineering Sciences
- Optics and Photonics
- Polymer Science
- Renewable Energy
- Security and Digital Forensics
- Signal, Image and Speech Processing
- Software Engineering
- Transport Technology
