InnovationQ PLUS

POWERED BY IEEE AND IP.COM

InnovationQ Plus is a powerful innovation discovery and analytics platform that combines deep engineering knowledge contained in IEEE documents with IP.com's global patent and non-patent literature. Powered by IP.com's proprietary cognitive retrieval engine, InnovationQ Plus rapidly sifts through massive amounts of big data to quickly and efficiently pinpoint relevant patents, applications, and non-patent literature, delivering industry-leading search results.

Why InnovationQ Plus?

IEEE publications are critical to the patent process — IEEE literature is cited in patents three times more than any other publisher. Indexing the full text of IEEE publications alongside the most comprehensive global patent literature database available gives you a single, integrated solution that accelerates discovery of key insights and time to market.

Discover more with one search

InnovationQ Plus enables IP discovery, analysis, and mapping of patent and non-patent material in one easy-to-use, highly accurate search tool. InnovationQ Plus allows you to:

- Analyze your IP's position in the market
- Understand and optimize your company's IP
- Monetize IP assets
- Optimize R&D investments
- Identify industry activity and discover opportunities

- Assess competitive threats
- Understand points of differentiation from competitors
- Evaluate partnership and licensing opportunities
- Seamlessly navigate to IEEE *Xplore* to access IEEE full text documents for further review

About IEEE

The IEEE is the world's largest professional association advancing innovation and technological excellence for the benefit of humanity. IEEE is the trusted "voice" for engineering, computing, and technology information around the globe through its highly-cited publications, conferences, technology standards, and professional and educational activities.

About IP.com

IP.com enables the world's leading technology companies and research institutions to drive innovation and growth. Our powerful combination of exclusive digital content, analytics, and professional services enables organizations to make critical business decisions around competitive intelligence, monetization of their intellectual property, and asset management.

IEEE
Advancing Technology for Humanity

Go beyond patents

Discover and analyze a wide range of content including:

- IEEE journal articles, conference papers, and standards
- The most intuitive repository of patent and non-patent documents in the world
- Licensable technology
- Other non-patent literature including PubMed Central and IP.com's Prior Art Database

Benefits for multiple groups

The powerful, yet user-friendly tool makes it accessible to any profesional, from intellectual property teams, legal teams, and technology transfer officers, to engineering, business development, investors, and senior executives.

Patented semantic search platform

Developed by experts in machine learning, the proprietary search engine allows anyone to find valuable content that is buried deep in complex patent and technical documents, allowing researchers and analysts to efficiently and effectively complete more of the prior art process, increasing productivity.

- Concept extraction results in more accurate document retrieval that a traditional keyword search cannot replicate
- Eliminating the need to use complex Boolean queries to deliver comprehensive results reduces learning curve and saves time. Simply use keywords or phrases, a paragraph, or pages of content to discover highly relevant results and insights.
- Uniquely tuned for IP to traverse documents that are often complex, contain repetitive information, and are worded to protect through obfuscation

Visualize concepts with the map tool

The map tool provides users with a visual representation of critical documents based on concepts and meaning extracted from their content. Easily identify white space and quickly highlight documents by specified assignees.

Identify licensable technologies

InnovationQ allows you to research by licensable technology and pinpoint highly qualified licensing prospects.

More features to streamline your workflow

- Narrow results with filters
- Share information with colleagues with collaboration tools
- Manage your portfolio by saving results and setting alerts
- Quickly export PDF reports, results, charts, and maps
