MIT Press eBooks Library

Computing & Engineering Collection

IEEE has partnered with the MIT Press to bring high-quality eBooks content in computer science and engineering to the IEEE *Xplore*® Digital Library

More than 1,015 titles in fields including computer science, artificial intelligence, information theory, computer programming, information technology, and electrical engineering broaden the research available to your organization in one platform.

MIT Press eBooks Library content areas—computing & engineering:

The collection of titles includes practical handbooks, introductory and advanced texts, reference works, and professional books, with an emphasis on leading areas of applied research, such as:

- Bioengineering
- Communication, Networking, and Broadcasting
- Components, Circuits, Devices, and Systems
- Computing and Processing
- Engineered Materials, Dielectrics, and Plasmas
- Engineering Profession
- Fields, Waves, and Electromagnetics
- Geoscience
- Power, Energy, and Industry Applications
- Robotics and Control Systems
- Signal Processing
- Transportation

A sampling of some recent and popular titles:

- *Accelerating Innovation: Competitive Advantage through Ecosystem Engagement*
- *Bioethics and Brains: A Disciplined and Principled Neuroethics*
- *Formal Methods for Multi-Agent Feedback Control Systems*
- *Perspectives in Antenna Technology: Recent Advances and Systems Applications*
- *Science Competes: Informing Policy in a Time of Distrust, Fracture, and Chaos*
- *The Computer Always Wins: A Playful Introduction to Algorithms through Puzzles and Strategy Games*

Quick Facts

Access to a specially selected collection of more than 1,015 titles, handpicked for their relevancy to IEEE *Xplore* users

80% of titles in computing-related fields

20,300 individual chapters

Up to 40 new titles added each year, many of which are unavailable on other eBook aggregator platforms

Backlist to 1943

KBART/MARC records available via the OCLC website (OCLC.org)

Available in two purchase options:

Annual Subscription Option
Provides leased access to current year eBook titles plus leased access to the backlist of over 1,015 titles.

Purchase Option with Perpetual Access*
Provides perpetual access to current year eBook titles plus perpetual access to the backlist of over 1,015 titles, with an option to expand your collection by purchasing new frontlist titles each year.

*Perpetual access to the collection is offered via IEEE *Xplore*

MIT Press eBooks Library—Computing & Engineering Collection

Delivered through the IEEE *Xplore*® Digital Library

Access respected technology research that generates results

IIEEE *Xplore* includes **top-ranked journals and technology research that is cited in patents 2.5 times more often than any other publisher.** With more than 7 million full-text documents, IEEE *Xplore* is your gateway to approximately 30% of the world's current literature in electrical engineering, electronics, and computing.

Find relevant research faster with powerful search tools

The eBook collections hosted in IEEE *Xplore* are searchable by keyword, publisher, title, or topic, allowing users to easily find their subject of interest. Depending on the collection, eBooks are available to be downloaded as full chapter PDFs or full book PDFs.

Also in IEEE *Xplore*:

IEEE *Xplore* also provides:

- More than 7 million documents in full-text PDF format, with over five million in a robust, dynamic HTML format
- Multiple authentication options for on-site, remote, and mobile users
- Abstract/citation and bibliographic records for subscribed content
- Mobile-friendly design
- Daily content updates

About the MIT Press

The MIT Press is a leading university press affiliated with the Massachusetts Institute of Technology (MIT) in Cambridge, Massachusetts, specializing in science and technology. They are a leading publisher in diverse fields, such as architecture, social theory, economics, cognitive science, and computational science. As the major American university press for science and technology books, the MIT Press has a long-term commitment to the efficient and creative use of new technologies.

Award-Winning Titles

Winners of the American Publishers Award for Professional and Scholarly Excellence (PROSE Award)

- *Reality Mining: Using Big Data to Engineer a Better World* by N. Eagle and K. Greene
- *Disaster Robotics* by R. Murphy
- *The Globalization of Clean Energy Technology: Lessons from China* by K. Gallagher
- *The Innovator's Hypothesis: How Cheap Experiments Are Worth More Than Good Ideas* by M. Schrage
